

AEROFLEX® - A

PROTAPE™

**Self-adhesive EPDM rubber tape for
insulation tubes and sheets joints**

***Extra protection against
moisture penetration at glued joints
of elastomeric closed cell insulation
tubes and sheets***

PROTAPE™

Self-adhesive elastomeric EPDM rubber tape for extra protection of insulation tubes and sheets joints.

PROTAPE is an EPDM-based self-adhesive tape, specially made for adhering the joints of elastomeric closed cell rubber insulation tubes and sheets. PROTAPE provides extra holding strength to the joints and serves as a vapour barrier to prevent atmospheric moisture to penetrate through the seams. It is flexible, easy to wrap or patch tightly on the insulation surfaces.

Specification:

Specifications	Units	Test Results	Remark
Material			EPDM rubber
Color			Black
Thickness	mm	0.6	±0.1 mm.
Adhesion Peel Strength	kg/25mm	>0.4	Speed 20 mm/min ASTM D 3330
Tensile Strength	N/mm ²	>2.5	Speed 50 mm/min JIS K6301
Elongation	%	>50	Speed 50 mm/min JIS K6301
Holding Power	hr	>3	ASTM D 3654
Initial Tack	cm	<1.5	ASTM D 3121 Ball # 15/32"
Adhesive			Acrylic pressure sensitive adhesive.

PROTAPE : Standard sizes and Packing

One roll of Protape is shrink wrapped and packed in Master carton

Code	Size	Rolls/Carton	Carton Size
TPPRV 0650025	0.6mm x 50mm x 25mtrs	12	380mm (L) x 200mm (W) x 340mm (H)
TPPRV 0625025	0.6mm x 25mm x 25mtrs	24	380mm (L) x 200mm (W) x 340mm (H)
